

WEEE / RoHS Directives

Dear Customer

The Commission of European Union has legislated to put the following new directives

- Waste of Electrical and Electronic Equipment (2012/19/EU)
- Restriction of Hazardous substances (2011/65/EU)

Waste of Electrical and Electronic Equipment (WEEE) directive 2012/19/EU, regulates the end of life disposal and recycling of electrical waste. Halogen containing base material are affected by this regulation as they need to be declared as special waste while the halogen free waste can be disposed as standard waste.

The Restriction of Hazardous Substances (RoHS) directive (2011/65/EU) prohibits the use of the following substances:

- Cadmium
- Hexa valent Chromium
- Lead
- Mercury
- Polybrominated biphenyls (PBB)
- Polybrominated biphenylethers (PBBE or PBDE)

Varioprint AG confirms that, to the best of our knowledge, our products we produced do not contain any of the substances prohibited by directive RoHS (2002/95/EWG) considering the actually Commission Decision of 10 Oct'12.

For general information, please contact our Environmental Issues Manager: Mr Christoph Hutter.
